TITLE : MOLD FOR MOLDING MOLD, ITS
PRODUCTION, AND DEVICE FOR
PRODUCING THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To provide a mold for molding a mold, capable of being easily produced without relating to the shape and curvature radius of a molding surface, to provide a method for producing the mold, and to provide a device for producing the mold.

SOLUTION: The small diameter portion of a lower mold 16 is inserted into the penetrated hole 14a of a body mold 14 from its lower end opening. A member 18 to be transferred and the small diameter portion of a transfer substrate mold 15 are successively inserted into the penetrated hole 14a from its upper end opening. In a device for producing the mold, the formed set mold is heated with a heater and pressed with a press force. Thus, the molding surface 15c of the transfer substrate mold 15 is inverted and transferred to the end surface of the member 18 to be transferred in the body mold 14.
